CROSS-PROGRAM SUMMARY:

PESTICIDES UNDER EPA STATUTES

U.S. Environmental Protection Agency

Washington, D.C. 20460

February, 1987

INTRODUCTION

Pesticides are regulated primarily under the Federal Insecticide, Fungicide and Rodenticide Act (FIFRA), but several other statutes administered by the U.S. Environmental Protection Agency (EPA) also include requirements which apply to pesticides. To aid in the development of a strategy to address the problem of pesticides in ground water, the Office of Ground-Water Protection and the Office of Pesticide Programs collaborated on a project to prepare a summary of how pesticides are covered by several EPA statutes related to ground-water protection.

The summary is organized alphabetically by the approximately 600 pesticide active ingredients. In addition to FIFRA, statutes for which information is included are the Resource Conservation and Recovery Act (RCRA), Safe Drinking Water Act (SDWA), and Clean Water Act (CWA).

The summary was prepared under contract to EPA by SRA Technologies, Inc. Donna Fletcher of the Office of Ground-Water Protection served as project manager, and many individuals throughout EPA assisted in reviewing and updating the information. Deserving special recognition are Carol Panasewich of the Office of Pesticide Programs who coordinated the extensive review within that Office, and George Clark of SRA Technologies, Inc., whose personal attention to detail made this project possible.
